

PAPER CIRCUITS

Visit the Youth Services desk to get your free paper circuits kit with LEDs, copper tape, coin cell batteries, circuit templates, and project examples!

The paper circuits kits will be available from Monday, June 22 until Saturday, June 27.

“Paper circuits is an activity that allows participants to both be creative and learn the elements of basic circuitry.”

—Dave Buker, Technology & Innovations Operations at COSI

“I hope they [children] use it [paper circuits, Chibitronics] the same way they use big, fat crayons to bring things that are in their imaginations out into the world so they can share it, play with it.” —Jie Qi, Cofounder & Creative Director of Chibitronics

For assistance with this project, visit <https://flipgrid.com/youthservices5469> to record and submit a short video with your questions.

You will receive a video response from a librarian! We are here to help with this fun project!
