

STEAM/Maker Activity

Week 5: July 13 – 18

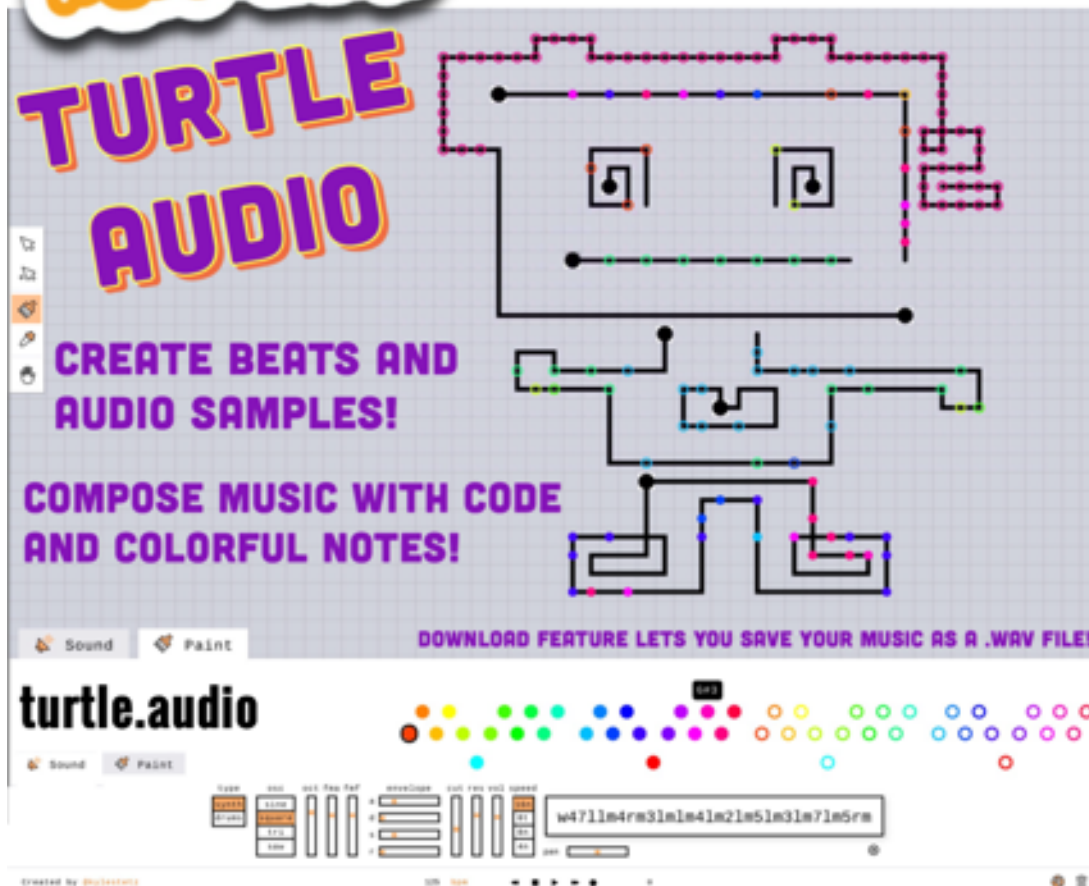

Have fun creating music with turtle.audio!

Turtle Audio was inspired by the Logo Turtle Graphics programming language and it is a playful way to learn, tinker, and create with math, coding, and music!

Use Turtle Audio to create your own sounds and music for video games and other projects in the Scratch programming language!

Visit our Turtle Audio FlipGrid Topic for project examples, tutorials, make-alongs, and resources at <https://flipgrid.com/64fb8542>

Record or upload a response video to our FlipGrid Topic to share your projects or any questions you may have. We are here to help with your project and we would LOVE to see what everyone creates!!
